How It Works

4 integrated workflows covering the full service cycle of your business

Supervisor

Receives WhatsApp messages from the client, understands what they need using AI and triggers the right workflow.

Scheduling Agent

Executes operations on Google Calendar: schedule, reschedule, cancel and check availability.

Knowledge Base

Answers questions about services, prices and business info using RAG with the business's own documents.

Automatic Confirmation

Sends WhatsApp reminders 24h before each appointment to reduce no-shows.

Supervisor

The brain of the system — understands the client and orchestrates everything

Multichannel

Processes text, audio (with automatic transcription) and images sent by the client

Grouped Messages

If the client sends multiple messages in a row, groups them all before responding — no fragmented replies

Natural Language

Understands "tomorrow at 3pm", "next week", "Monday" — no menus or commands

Automatic Validation

Checks days off, past times and out-of-hours before attempting to schedule

Multi-Professional

Works with any number of professionals — each with their own independent schedule

Conversation Memory

Remembers data already provided and doesn't ask again. Reuses name, phone and history

Supervisor — N8N Workflow

81 nodes orchestrating user verification, routing, message buffering, main agent and history

Scheduling Agent

4 complete operations, all via natural conversation on WhatsApp

Schedule

- Checks availability before confirming
- Detects conflicts in real time
- Filters by professional or distributes automatically
- Shows available slots to the client

Reschedule

- Lists the client's upcoming appointments
- Changes date, time or professional
- Professional switch handled securely
- Only cancels the old one after confirming the new

Cancel

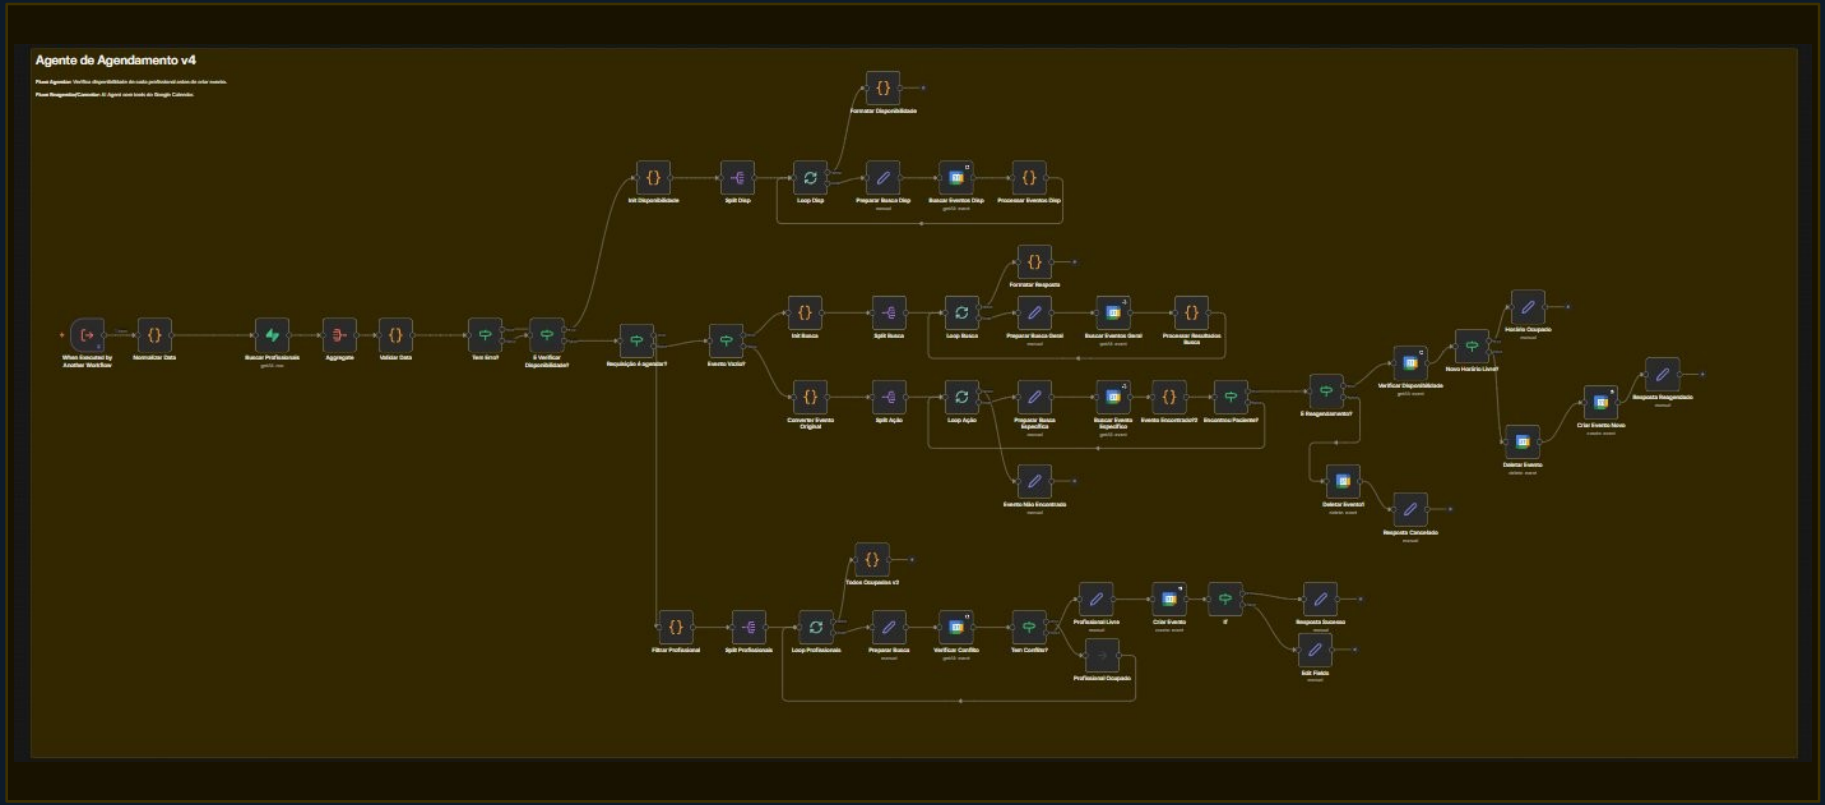
- Locates the appointment automatically
- Searches across all business calendars
- Asks for confirmation before executing
- Response with full appointment details

Check Availability

- Query by day, period or time slot
- Automatically searches upcoming days
- Shows free slots by professional
- Integrated into the scheduling flow

Scheduling Agent — N8N Workflow

54 nodes with date validation, conflict checking, multi-calendar search and CRUD operations



Automatic Confirmation

Intelligent reminders that reduce no-shows

Automatic Schedule
Runs daily

Fetch Appointments
Next 24 hours

Check Duplicates
Avoids repeat send

Send Reminder
Directly on WhatsApp

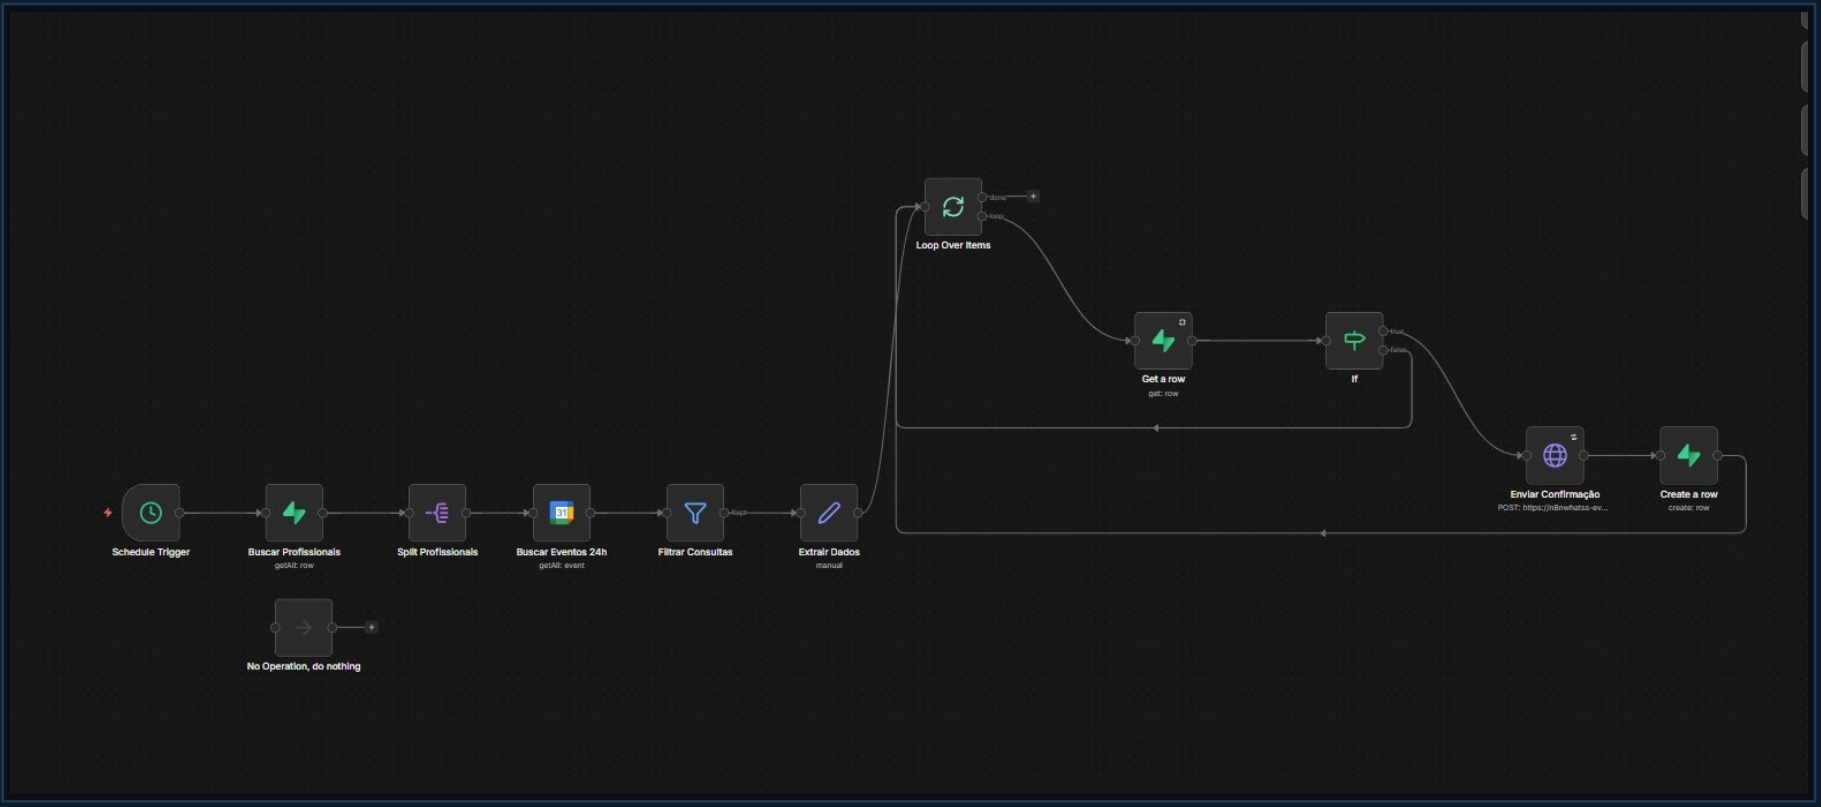
Register Send
Full control

Business Impact

Automatic reminders 24h in advance reduce no-shows by up to 30–40%. Each client receives only 1 message per appointment, no spam. The business doesn't have to do anything.

Automatic Confirmation — N8N Workflow

12 nodes with schedule trigger, Google Calendar search, duplicate control and WhatsApp sending



Knowledge Base (RAG)

The agent answers questions about services, prices and business information

Client Asks

"How much does a facial cost?"

AI Searches the Base

Embeddings + Similarity

Business Documents

PDFs, price tables

Accurate Response

Real business data

Simple Upload

Upload PDFs with catalogs, price lists or manuals — the system indexes them automatically

Reliable Responses

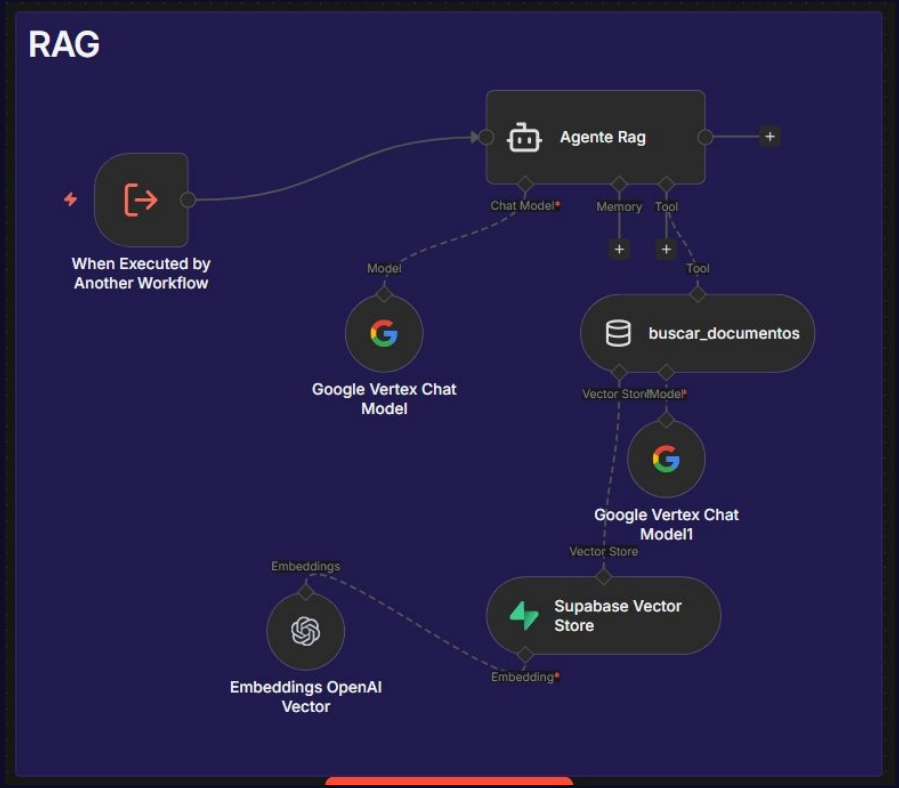
Responds ONLY with data from the documents. Never invents prices or information

Integrated with Scheduling

Client asks the price, likes it, and schedules right away in the same conversation without leaving WhatsApp

Knowledge Base — N8N Workflow

RAG Agent with vector search on Supabase, OpenAI embeddings and contextualized response



Client Experience

Natural conversation, no menus or commands

WhatsApp — Your Business

Hi, I'd like to schedule an appointment for 3pm tomorrow

Sure! What's your full name?

Maria Silva

I'll schedule for 04/02 at 3:00pm. Confirm?

Confirmed!

Scheduled! ✅
· Client: Maria Silva
· Date: 04/02/2026
· Time: 3:00pm

- Understands everyday natural language
- Identifies the client by phone automatically
- Professional selection works naturally
- Reschedule and professional swap in 1 message
- Doesn't ask for data already provided
- Empathetic and humanized tone in responses

Production Ready

Complete WhatsApp + AI scheduling system. Scalable for any business, any number of professionals, 100% automated.
